Joining me today is independent investigative journalist, Vanessa Beeley, here to discuss the growing world-war dynamic in the Middle East and the ongoing genocide in Gaza that is now being recreated in Lebanon with little to no push back by the supposed “rules-based international order”. We also discuss how the global technocratic elitists are using Gaza as a testbed for artificial intelligence — fine tuning for future military use on a mass scale, as well as domestic control structures — and how the rising global resistance is not just about the future of Gaza, but the future of us all.
